## **LG is the key actor in coping with env. Problems.**

Constraints and obstacles are...

- Lack of flexibility and freedom
- Lack of sufficient financial resources
- Lack of capacity and experience
- Lack of enough information and guidance

## 10 points...guiding the LGs for urban env. management

1. Self-reliance
2. Interdependence
3. Training or capacity building
4. Data collection
5. Involvement of community
6. Information dissemination
7. Empowerment of local community
8. Coordination and integration
9. Monitoring and evaluation
10. Legal framework and enforcement

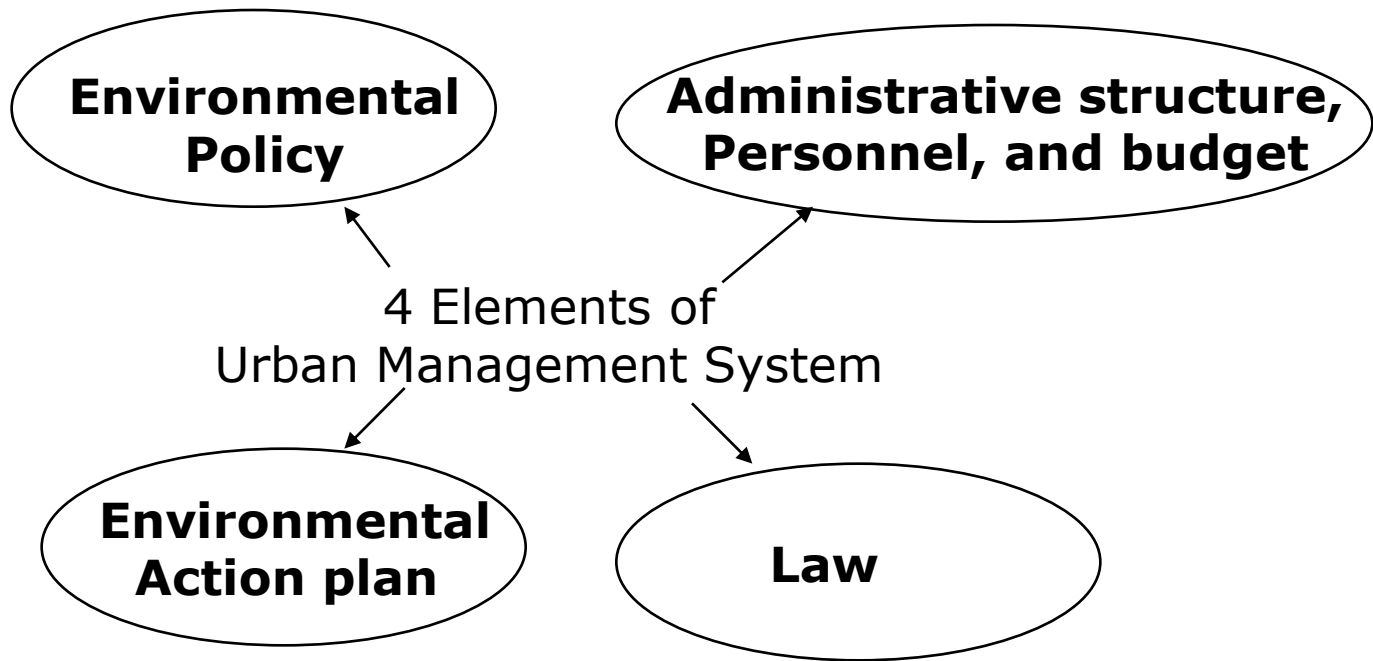

# Management System of Urban Environment

- The system should response well to the stated policies
- The system is focusing on preventive measures rather than curative
- The system is flexible to current situation

# Urban Environmental Action Planning Process
