Applying The Eco-Savers Program of Marikina City, Philippines in Vinh City of Viet Nam

02/10/2011 12:41

One solution to ensure the clean and beautiful city is the protection of the environment, living and working towards ecology. With such in mind, community leaders and city of Vinh always closely linked between environmental protection and green living practices. Some schools have chosen for experimental application of eco-saving program for 2 years from 2011 to 2012 model Ecosystem Restoration of Marikina City, Philippines.

The City organized the "Eco-Savers Program" in three schools in the province of Hung Dung. These 3 schools were selected as the pilot of this program. With the determination of city leaders as a green, clean, all staff, teachers, pupils, parents and the wider community of the whole city has been actively participate in a most efficient way.

The pupils expressed their understanding about the benefits of this program so they get excited to participate in the program. In addition to the benefits of the program is to contribute to the management, classification of waste from the household, while also bringing economic benefits to save certain ecological and cost savings for city waste disposal. Therefore, the city hopes to create a broad movement of pupils and the community on the classification of waste which can be recycled, reused.

Mr. Nguyen Trung Chau – Vice Mayor of Vinh City

Mr. Nguyen Trung Chau – Vice Mayor of Vinh City said: "Research on ecological models of Marikina, Philippines, the city found that the environmental protection should be awarded for ecological conservation from pupils and should be applied from the schools so that impacting pupils, teachers and parents. Therefore, Vinh city is excited in the application of best practice models of friend country in our city. In the future we will continue to implement this program in the city with ambitions to further expand the program's effectiveness".
